Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.

- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.

- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.

- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).

- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-3 and 7, drawn to antibacterial agents.

Group II, claims 4 and 5, drawn to methods of treating H. Pylori or gastric ulcer.

Group III, claim 6, drawn to method of preparing antibacterial agents.

The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Common to all groups is an antibacterial agent having a sulfated polysaccharide or oligosaccharide chemically bonded to an antibacterial substance. JP 10-114660 (reference supplied by Applicant - see abstract) discloses an antibacterial agent comprising a conjugate of a sulfated polysaccharide (heparin) and 3-(triethoxysilyl)propyl-dimethyloctadecyl ammonium chloride. Therefore there is no novel, special technical feature, supplied by Applicant that unifies the groups.

Art Unit: 1623

It is noted that while claims 4 and 5 (Group II) are technically written as composition claims, it appears that the Applicant intends "method" claims, in accordance with U.S. practice. However, if this is incorrect, and the claims are indeed meant to be composition claims, Applicant should make that clear in the response to this restriction requirement. In this case, those claims would be considered part of Group I, leaving only Group I and Group III.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
